SUMMERY

Software Engineering graduate from Adama Science and Technology University with hands-on experience building production-grade web and mobile applications. Comfortable working across the entire development lifecycle, from architecting real-time systems and integrating third-party APIs to deploying in agile, collaborative environments. Driven by a passion for turning complex problems into clean, intuitive software that people actually use.

EXPERIENCE

2024
Adama, Ethiopia

Frontend Developer Intern

ASTU ICT center

- Engineered a secure peer-to-peer Employee Evaluation System for staff members using React and Tailwind CSS. Designed administrative dashboards with responsive data metrics widgets, integrating clients with core university APIs to enable real-time data visualization and reporting.

2025
Addis Ababa, Ethiopia

Full-stack Developer Intern

GoldenAge Technology PLC

- Contributed full-stack updates to a slide template generator app using modern web technologies. Utilized GitHub workflows and conventional commits in an agile environment, collaborating with the team to ship new features and improvements.

EXPERIENCE

COSMIC *AI Presentation Builder*

Developed an AI-powered presentation platform that transforms prompts, documents, and webpages into editable PowerPoint presentations using the Google Gemini API. Implemented drag-and-drop slide editing, real-time updates, authentication, and server-side PPTX generation.

STAYGENT *Hospitality & On-Demand Services Platform*

Built a production-grade marketplace connecting guests, hosts, and service providers. Developed role-based dashboards, real-time messaging, AI-powered recommendations, secure identity verification (KYC), payment integration, and a fully responsive user experience with Next.js and TypeScript.

GEBEYA *Full-Stack E-Commerce Platform*

Engineered a full-stack MERN e-commerce application featuring customer and admin portals, JWT authentication, Cloudinary image management, product and order management, and payment gateway integration in a responsive, production-ready platform.

SKILLS

Core Technologies

- HTML5, CSS3, JavaScript, TypeScript

Frontend

- React, React Native, Expo, Next.js, Tailwind CSS, TanStack Query, Shadcn UI, Framer Motion

Backend

- Node.js, Express.js, Go, Gin, Socket.IO

Databases & ORM

- PostgreSQL, MySQL, SQLite, Prisma ORM, Drizzle ORM
